Energy Management Policy

As Kılıç Deniz Ürünleri Üretimi İth. İhr. ve Tic. A.Ş., we aim to manage all our operations through a corporate energy management system approach, thereby ensuring efficient use of resources and reducing energy costs.

We recognize that our energy performance and efficiency can be made more sustainable through a principle of **continuous improvement**, and we are committed to maintaining this continuity.

In order to achieve these goals and objectives, Kılıç Deniz Ürünleri İth. İhr. ve Tic. A.Ş. adopts a realistic and integrated energy management approach and commits to:

- Fully complying with all applicable legal requirements and other obligations, while upholding our ethical values,
- Prioritizing energy efficiency in all our processes, adapting to technological advancements, supporting the procurement of energy-efficient products and services, and promoting design activities that improve our energy performance through continuous improvement,
- Ensuring that our energy performance is measurable and reported regularly, and shared with relevant internal and external stakeholders,
- Placing emphasis on energy efficiency awareness activities,
- Ensuring that all necessary resources and information required to achieve these goals are up-to-date and accessible,
- Regularly reviewing our energy management policy, setting higher goals and objectives within the scope of continuous improvement, and continuing our activities accordingly.

We hereby declare and commit to the above.
