Mediterranean tastes on the tables of the world

Where We Are

We are in Bodrum which is a large peninsula on the south-west coast of Türkiye. It is surrounded by the Gulluk Bay in the north, Gokova Bay in the south and the Aegean Sea in the west. The peninsula is surrounded by the Mediterranean climate. It has lots of wonderful bays which include valuable seafood sources. The distances between towns are short and make it easy to travel from one place to another. Bodrum peninsula has different alternative to travel, delicious foods and historical places. For Instance, Mausoleum, regarded as one of the Seven Wonders of the World, one of the world's most important underwater archeology museum, Ancient Theatre of Bodrum, Myndos Gate which is reputed to be built in 360 b.c. etc.

Since 1993, Kılıç Seafood became the world's leading aquaculture brand thanks to its rapid growth and its provision of service with the concept of full integration. Kılıç Seafood operates according to EU and FDA standards in its all fields as juvenile fish breeding, aquaculture; fish feed production, fish box production, processing, packing and distribution.

Kılıç Seafood operates aquaculture in off-shore (open sea) systems located in the healthy waters of the Mediterranean and serves the marvelous Mediterranean tastes to the tables of fish enthusiasts approximately in 60 countries around the world. Kılıç Seafood who has become a world leader with its annual juvenile production capacity of 500 million, produces Sea Bream, Sea Bass, Royal Sea Bass (Meagre), Trout, Salmon Trout, Sea Trout and Bluefin Tuna.

Kılıç Seafood has a production capacity 75,000 tons and creates an effective sales marketing and distribution network all around the world. This enables Kılıç Seafood to be proud of being Türkiye's leading exporter in all the field.*

*Türkiye Exporter's Assembly – Seafood and Animal Products Category (2010-2022)

Kılıç Seafood in Numbers

The world's biggest fully integrated plant with a large production volume
(Total annual production capacity of Sea Bream, Sea Bass, Royal Sea Bass (Meagre), Trout , Salmon Trout, Sea Trout 75.000 tons)

The world's biggest juvenile fish production capacity
(Total production capacity of Sea Bream, Sea Bass, Royal Sea Bass (Meagre), Trout , Salmon Trout and Sea Trout is 500 million juveniles per year)

One of the biggest fish feed production company in Europe
(Production capacity is 195.000 tons/year)

The Champion in Türkiye in its field with exports to 60 countries
(Turkish Exporter's Assembly - Seafood and Animal Products Category 2010-2022)

Kılıç Seafood raises the standards, leads the sector and ranks among Türkiye's biggest companies

Our Environmental Sustainability Process

As Kiliç Seafood, we are proud of our leading companies with more than 2500 employees, 75 thousand tons of production and exceeding 300 million dollars production.

We hold all the quality standard certificates for our industry and ISO18000, ISO22000, IFS, BRC, Global GAP certificates as well as Aquaculture Stewardship Council (ASC) certificates. We also have certificates in the fields of production and environment, which are especially accepted around the world. ASC is one of the world's leading certification and labeling certifications in the field of responsible aquaculture. The GLOBAL GAP certificate is one of the most important certificates that indicating that food production is performed under hygienically safe conditions and the products are produced through environmentally friendly practices. Our fully integrated production process and our sense of responsibility towards the environment enable us to raise our success rate to the next level every year and to ensure the sustainability of our brand value.

We have many environmentally friendly applications. Some of those;

- Electricity obtained from solar panels is used as an energy source in our facilities as much as possible. In this way, raw materials are saved and carbon emissions are reduced.

- Periodic wastewater analyzes are carried out in all our hatcheries and adaptation facilities in accordance with the legal legislation. The results are in accordance with in ideal values and are processed into the system of the Ministry of Environment and Urbanization.

- Within of regulations, trix analyzes (The Trophic Index (TRIX) to protect the marine environment more effectively) are carried out regularly every year. Analysis results are transferred to the data system of the relevant ministry.

- Hazardous wastes at the all facilities are stored in accordance with the legal legislation and sent to licensed recycling companies in periods that will not exceed the legal requirements

- By keeping the environmental compatibility under control with the ozone systems in our extruder fish feed facilities, air emission measurements are made in conformity with the legal legislation.

It is our mission to fulfill our responsibilities for the humanity of today and the next generations, to act with the awareness of environmental protection and spread this mentality. We implement that environmentally friendly applications along with the preventive actions against the unnecessary use of resources with our sustainably improving production system.

Diamond of the Sea

We call Bluefin Tuna (*Thunnus Thynnus*) as the diamond of sea for reason;
It is very valuable in terms of nutrition.

Omega 3 fatty acids in Tuna that comes as delight to the tables with Kılıç Seafood quality, specialty and sensitivity, is significantly important in terms of protection of cardiovascular health. Furthermore, Tuna fish also decreases the risk of stroke and Alzheimer's disease, protects eye health, and prevents many cancer risks. The selenium inside makes people happy, and eliminates toxins out of body.

Diamond of the Sea

Bluefin Tunas are caught in the blue waters of Mediterranean Sea,
approved by ICCAT and exported to mainly Japan,
so they have already become an indispensable taste for people who love Sushi and Sashimi.

This delicious treasury is now accessible any time thanks to Kılıç Seafood.
