Plant-Based Raw Materials Free from Deforestation and Land-Use Conversion Policy

As Kiliç Deniz, we announce our commitment to transition to supply chains that do not include deforestation and natural habitat conversion in the supply of all plant components, within the scope of the requirements of the ASC Feed Standard v1.1.

In this context;

- Not using any resources that lead to deforestation and natural habitat transformation,
- To take and implement all necessary measures by the end of 2025 for the transition to deforestation-free and transformation-free supply chains,
- To continuously monitor our supply chain in line with this goal and to report it in a transparent and accountable manner,
- We declare that we act with the aim of sharing our sustainable

procurement policies publicly.

Introduction and Scope

As Kiliç Deniz, we recognize that the forests and natural ecosystems on our planet are vital for reducing climate risks, protecting biodiversity and sustaining the livelihoods of billions of people. In line with our corporate sustainability strategy, we monitor our supply chains.

We are committed to deforestation. This policy covers all Kiliç Deniz operational units, including direct and indirect procurement, processing and physical trade, and procurement, especially soybean meal. It encompasses all plant-based ingredients that we use.

Commitment

As Kiliç Deniz, we are committed to promoting the responsible sourcing of all our plant-based ingredients. We are committed. We recognize that we need to strengthen cooperation with our stakeholders and especially with our suppliers.

Our deforestation effort, which began on December 31, 2020, will continue to comply with zero deforestation and transformation mechanisms by December 31, 2025 at the latest, for all plant-based ingredients we supply for our ASC feed production.
